Weather Key Points

Regional Operations Center

Western Region

Saturday, November 12

- Light valley rain and mountain snow will occur over portions of northern California through Saturday night, including the northern Sierra.
 - Snow levels will hover between 3,500 and 4,500 feet, though no widespread or significant impacts are expected at this time with only light mountain snowfall accumulations
- Locally breezy winds gusting up to 45 mph are expected over much of southern California on Sunday
 - A Santa Ana wind event with wind gusts to 55 mph is looking likely Tuesday through Thursday (strongest Wednesday) in southern California, with locally elevated fire weather conditions
- Below normal temperatures will persist over much of the state through next week, with overnight low temperatures dipping into the 30s across the Central Valley and even for areas closer to the coast at times. Readings over the higher elevations will reach the single digits.
